

# Service Bay Safety is Smart Business

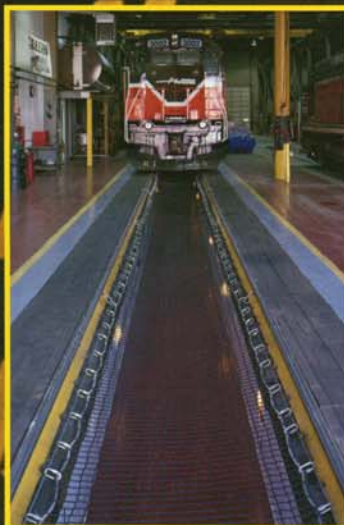

BayNets™ Safety Systems  
create safer environments for  
your employees and customers

BayNets™ products are easily  
adaptable to rail, bus and  
virtually all other commercial  
fleet maintenance facilities

BayNets™ Automotive Quick Lube Facilities

BayNets™ Rail

BayNets™ Mass Transit

# BayNets™ is the industry's most effective open pit safety system

*If your facility has open pit service bays, you know the value that speed, efficiency and ease of access adds to your bottom line. BayNets™ Safety Systems are designed to provide the benefit of safety without slowing your technicians down.*

- Promotes safer work habits in hazardous areas of your service center
- Glides open and closed fast from either end of the bay
- Creates continual safety awareness around the open pit
- Rugged, reliable open web design provides visibility into pit area
- Easy to install, system can accommodate any bay configuration

## The lightweight system with heavyweight capabilities

- Specially designed, petroleum-resistant high-tenacity polypropylene netting installed with aircraft cable and forged hardware
- Installed BayNets® Safety Systems have a tensile strength of over 3 tons
- User-friendly design has no rough edges, grids or flaws to cause injury
- Non-snag, easily retracted netting and cable fabrication has no moving parts to wear out and requires no maintenance
- Research shows that the BayNets® Safety System is so fast and easy to use, technicians adapt to it very quickly
- A simple mechanical design in sizes to fit any service bay.
