

Introducing an exclusive safety netting product that eliminates the need for interior scaffolding in clear story/ balloon framed areas.

INCOR

**Interior
Residential
Contractor's
Safety Net
System**

InCord is setting a new standard for residential construction safety net systems

- Meets job specific standards for personnel safety netting
- Used in clearstory/ balloon framed areas
- Easy installation – 30-90 min. per house
- Can be installed right after plum and line
- Used for fall protection during loading trusses, stacking trusses, fascia and sheathing
- Reusable – reduces the cost of the net (cost can be deferred over use on 50 houses or more)
- Eliminates need for interior scaffolds – opens up room for other trades
- Easy to store
- 10 stock nets adjustable to over 200 room sizes
- Safety orange color for easy identification and visibility
- A selection of InCord net attachment hardware is available

Safety is good business.

Providing a safe working environment isn't just a good idea, it's the law. The Interior Residential Constructor's Safety Net System helps you:

- Comply with federal and other state safety regulations.
- Adhere to loss prevention strategies insurance companies believe will lower your risk — including legal risk.
