CageX™ Safety Net

INCOR

The CageX™ Ladder Cage Extension Net

Extend protection from the ladder cage to the elevated platform handrail – covering a potentially dangerous access area between the ladder cage and platform.

InCord CageX high strength nets add an extra level of safety to an otherwise unprotected area when ascending or descending an exposed ladder.

Everything you need in one bag

The CageX System consists of a high strength net panel of 4 inch HTPP mesh, bound with 1/4 inch polyester cord. Polyester straps secure the net to the rail and ladder cage.

- Protects workers when using caged ladders
- Extends protection from the cage to the platform handrail
- Meets OSHA regulations for fall protection
- High strength polypropylene and polyester materials
- Long lasting UV resistant
- Available in 48" x 48" and 60" x 48" sizes
- Easy to install, custom sizes available

We can provide you with in-stock netting or custom netting solutions.

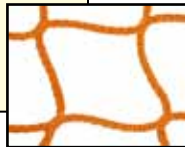

A CageX™ Ladder Cage Extension Net is a simple barrier solution for a common yet potentially deadly fall hazard.

Easy to install barrier panels are low cost and low maintenance.

Specifications for CageX™ Netting
